

Oxyfume 12

Ethylene oxide mixtures used in equipment sterilization

Formula:	Mix. ethylene oxide & dichlorodifluoromethane
Trade Name:	Sterilants Mixture; 12-88
Product Name:	Compressed gases flammable gas,n.o.s. (ethylene oxide, dichlorodifluoromethane)
Shipping Information:	CAS Registry Number UN 1954
DOT Proper Shipping Name:	Compressed gases flammable gas,n.o.s. (ethylene oxide, dichlorodifluoromethane)
DOT Classification:	2.1
DOT Label:	Flammable Gas

Cylinder Specifications

Cylinder Size	Content		Valve Outlet CGA No.
	Pounds	Liters	
FC	135	---	510

*Typical mixtures include 12% EtO/balance dichlorodifluoromethane.
Different blend and analytical specifications apply based on concentration.
