

Equipment Installation Assessment Service

Our desire at **Matheson Tri-Gas (MTG)** is that you, our customers be able to rapidly and effortlessly install and start-up your new MTG gas source and distribution equipment. To facilitate this goal, MTG offers you the additional opportunity of having a fully-trained, experienced MTG field service technician perform an on-site installation assessment. Once you have completed the installation and hookup of the equipment, our field service technician will verify that the equipment is functioning properly and that the equipment is ready to run the intended process gas. In addition, our field service technician will provide a hands-on overview of the equipment for your employees and/or contractors that will be operating the equipment.

Some of the services provided include:

- Visually inspect the MTG equipment to ensure that there is no damage to the equipment and that the correct cylinder connection is installed.
- Functionally test the system(s) to ensure that the hardware and software are interfacing properly. This test includes operational checks in both the normal and alarm conditions.
- Zero the pressure transducers.
- Verify the proper operation of the EMO button and equipment shutdown process.
- Set up the scale platform (if applicable).
- Provide advice and assistance in performing inboard and outboard leak testing.
- Provide hands-on equipment familiarization training including an overview of the equipment operations (e.g., component location and functions, controller screens and functions.) **

** An extensive, more comprehensive training class is available to interested customers. Please contact your local MTG sales engineer for a quotation.

Pricing

\$600 per half day plus actual travel expenses (e.g., airfare, lodging, meals and rental vehicle). The quantity and complexity of the equipment will dictate the required number of days on-site. Services will be charged in half day increments with a minimum charge of one day.

These services can be modified and/or augmented to suit your individual needs. Please contact your MTG sales engineer if you desire a customized service package.
