Model FM-1050 Series
High Accuracy Flowmeter (150mm)

Description
Matheson’s FM-1050 Series Flowmeters provide the most accurate indication and precise control of fluids available for a wide range of applications. This versatile meter is functionally and dimensionally interchangeable with other current designs while incorporating many innovative features.

All FM-1050 Series glass metering tubes have integral float guides to ensure a guaranteed ±5% (±1% with optional calibration) of full scale accuracy. Both glass and stainless steel floats are included. The meters are available in a range of 150mm reference indicating scales. Be sure to request calibration data for the gas(es) you will be measuring.

Standard with this series is the uniquely designed Tube-Cube®, the “cube,” a unitized tube holder, aligns the tube quickly and easily for simple tube installation or replacement. The Tube-Cube® provides protection during handling, reducing chipped tube ends, broken tubes and misalignment. The 1.5 X scale magnification lens allows for a more accurate reading. End seals in the FM-1050 are direct acting and nonrotating for fast alignment and convenient service access.

Valve Options
- No valve for those who just want indication
- Utility (six-turn) valve for those who desire control as well as indication
- High accuracy (fifteen-turn) valve, for very precise control and repeatability

Design Features
- High resolution 150mm scale length
- Precision tapered, fluted metering tube
- Low pressure drop for increased available flow rates at low feed pressures

Specifications
- Pressure Rating: 250 psig maximum
- Temperature Rating: 250°F maximum
- Accuracy: ±5% of full scale flow rate
- Optional Accuracies: ±1% of full scale for reference scales only
- Repeatability: 0.25% of scale reading
- Range: 10 to 1, i.e., 100% to 10% of full scale mm or linear flow with conversion curves and/or factors
- Scale Readings: Special direct reading scales available
- Shipping Weight: 1 lb

Materials of Construction
Wetted End Blocks, Fittings and Internal Parts: Brass, 316 stainless steel – standard; Anodized aluminum, Kynar, Monel – optional
Seal Materials: Buna-N or Viton – standard; EPR, Kalrez or Teflon – optional
Side Plates: Painted or anodized aluminum
Metering Tube: Borosilicate glass enclosed in Tube-Cube® holder
Piping Connections: Brass, 316 stainless steel – standard; Aluminum, Monel – optional
Float Materials: Black glass and 316 stainless steel – standard; sapphire, Carboloy or Tantalum – optional
Scale: Ceramic ink on glass tube, length 150mm

Don’t See It Here?
Matheson offers a complete line of variable area flowmeters. Our standard, more common configuration options are shown here. However, if you don’t see what you are looking for, contact us. We manufacture flowmeters for liquids as well as gases, and can use other end block materials, such as aluminum, Kynar and Monel, and other seal materials such as Teflon, EPR and Kalrez. In addition, we offer other connection fittings, including NPT, tube and hose, in a variety of sizes. Lastly, we have an enormous library of flow calibrations and correlation tables for dozens of other gases and a wide range of conditions.

So, if you don’t see it here, give us a call. We’ll build to suit your specific needs.

All flow rates are at 70°F and 14.7 psia

NOTE: Reference tubes are supplied with correlation charts for air and water flow rates at STP. If you require a correlation chart for other gases or liquids, or at pressures or temperatures other than standard, please indicate such when ordering.

*0-100 calibrated correlated reference tube scale only
