

Equipment for Environmental Compliance

SINGLE-CYLINDER STATION MANIFOLD

Each of the Continuous Emission Monitoring (CEM) instruments requires a complement of Daily Calibration Gas, Zero Gas, and Linearity Check Gases. Matheson Tri-Gas has single Cylinder Station Manifolds needed for safe handling, fast connections, fast purge, and quantitative EPA Protocol component recovery.

Product Features

- Eliminates handling the regulator during cylinder changeouts
- Reduces atmospheric contamination during cylinder changeouts (shut-off valve option at end of pigtailed for reactive gases)
- Reduces stress on tubing connections
- Supports high-purity applications
- Models for both stainless steel and brass regulators
- Order regulator separately
- Other gases, features, and options are available
- See pages 268 for ordering information
