Model 3630A Series
Single-Stage High-Flow Corrosion Resistant Regulator – Stainless Steel, Hastelloy

Description
High purity, single stage regulator with tied diaphragm and Hastelloy trim for use with low vapor pressure corrosive gases.

Applications
- Supply of corrosive gases where extra corrosion resistance and positive shutoff is desired
- Supply of corrosive gases to manufacturing and research facilities

Design Features/Components
- 316 stainless steel regulator body provides good corrosion resistance
- Hastelloy internal valve trim provides an extra measure of resistance in the most vulnerable area of the regulator
- Tied Diaphragm for positive shutoff
- Metal to metal diaphragm to body seal
- 2” Stainless Steel gauges
- Stainless Steel cylinder connection
- Stainless Steel outlet diaphragm valve
- Stainless Steel 1/4” compression fitting on outlet
- Bonnet vent port, threaded
- Cv = 0.45

Materials of Construction
- Body: 316 stainless steel
- Diaphragm: Hastelloy
- Valve: Hastelloy
- Gauges: Stainless steel
- Seat: PCTFE

Specifications
- Maximum Inlet Pressure: 300 psig (2,070 kPa) (3630A)
- Maximum Inlet Pressure: 3000 psig (20,700 kPa) (3631A/3633A/3636A)
- Flow Capacity (Cv): 0.45
- Operating Temperatures: -40°F to +160°F (-40°C to +71°C)
- Body Porting: 1/4” NPT Female - gauges
- Body Porting: 1/2” NPT Female - inlet/outlet

Cross Purge Option
- Eliminates the escape of hazardous gases when changing cylinders
- Reduces danger of contamination from atmospheric moisture and oxygen
- Minimizes the amount of gas lost during cylinder changes
- Monel and Aluminum-Silicon-Bronze construction
