How Anti-Fatigue Mats Reduce Fatigue

Independent tests show that standing on a hard floor leads to an immobile standing pattern, causing stiffness and poor circulation. Anti-fatigue matting encourages subtle movement of leg and calf muscles, resulting in increased blood and oxygen flow – thereby reducing fatigue.

Further tests measure energy consumption in the supporting muscles used when standing on a hard floor, such as those in the legs and lower back. When standing on anti-fatigue matting, energy is conserved by as much as 50%.

These results are confirmed by subjective testing. In a real working environment, when comparing it with a hard floor, employees record that feelings of overall fatigue are reduced by as much as 50% when working on anti-fatigue mats.
**Matting Anti-Fatigue**

**Diamond-Plate Spongecote Mat** features a high-tech, anti-slip vinyl surface that is permanently bonded to a closed cell, non-absorbent sponge. Beveled edges add an extra measure of protection from trips. Mat has an overall thickness of 9/16’.

**UltraSoft Diamond-Plate Mat** is a resilient, double-thick (15/16”) sponge base mat. 5/32” vinyl diamond-plate surface provides added traction. Mat is not only chemical-resistant, but also three times more abrasion-resistant than competing products.

**UltraSoft Diamond-Plate with Gritworks Mat** combines comfort and traction to bring you an anti-fatigue mat with a slip-resistant surface. This mat is ideal for primarily dry locations where there is slight overspray from machinery or where grease and oil are tracked from other areas. The carbide grit surface increases traction by over 50% to reduce slips and falls. Mat measures 3/4” thick.

**Anti-Fatigue Mats for Dry Areas**

These mats are formulated with Nitricell®, a combination of Nitrile rubber and PVC that yields immediate recovery, better comfort and longer life. All styles include a three year warranty.

**Free BigFoot Samples from Wearwell!**

To get your Free size 14 BigFoot sample of the UltraSoft Diamond-Plate Mat and Diamond-Plate Spongecote Mat from Wearwell, simply give us a call and mention the part numbers listed. We want you to feel how soft these mats are underfoot, before you make your purchase.

**Our Matting can typically be custom cut to whatever size you need. Call for more details.**

Anti-Fatigue Mats for Dry Areas

- **Sof-Tred Mat with Dyna-Shield** features a protective barrier that makes it more resistant to wear and improves tear and abrasion resistance. A non-directional diamond deck plate top surface allows for sure footing and easy clean-up. ½” thick mats are ideal for medium-duty dry work areas. All mats are made of a closed cell PVC compound and feature beveled and sealed edges. 20035 will ship separately, direct from the manufacturer.

- **Cushion Trax Mat** brings cushioning comfort and support to dry work areas such as assembly lines, machinery work areas, packaging stations and shipping departments. Vinyl top surface is embossed with a raised diamond plate for anti-slip protection. RedStop™ is a built-in anti-slip technology that grips all types of smooth floor surfaces. It provides increased friction between the underside of the mat and the floor surface to stop mat movement. Mat measures ¾” thick and features beveled edges to reduce trips.

- **Saddle Trax Mat** is a thicker, heavier and stronger anti-fatigue mat that is designed to maximize workers production and comfort in tough industrial environments. The 1” thickness of this mat makes it ideal for multi-shift operations in dry work areas. A vinyl top surface bonded to a dense sponge base provides firm support. The diamond deck plate top surface design improves traction and reduces slips. RedStop™ is a built-in anti-slip technology that grips all types of smooth floor surfaces. It provides increased friction between the underside of the mat and the floor surface to stop mat movement.

**Kneeling Pads**

Your knees can take a beating over time. Take care of them while on-the-job with Kneeling Pads. These nitrile butadine rubber closed-cell foam rubber pads are non-conductive and silicone free.

Matting Anti-Fatigue

Sof-Tred™ Anti-Fatigue Mats with Dyna-Shield™

These mats are constructed with Dyna-Shield, a protective barrier that makes mats more resistant to wear and improves tear and abrasion resistance. ½" thick mats are ideal for medium-duty dry work areas. Both are made of a closed cell PVC compound and feature beveled and sealed edges. Both styles are black with a yellow border. 20034 and 20036 will ship separately, direct from the manufacturer.

- Razorback Mat features a wide rib top surface design that enhances traction and makes the mat easy to sweep clean.
- Bubble Sof-Tred Mat features a bubble top design which enhances traction and is easy to sweep clean.

Our Matting can typically be custom cut to whatever size you need. Call for more details.

Happy Feet™ Texture

Surface Anti-Fatigue Mat

Industrial anti-fatigue mats are constructed of a dense rubber cushion encapsulated within solid nitrile rubber to protect against deterioration and contamination. Mats resist chemicals, animal fats and petroleum products and are ideal for dry-to-damp work stations where traction is not critical. A low profile and beveled borders reduce slips and trips. Mats measure ½" thick and are static-dissipative for use in computer rooms and electrical part manufacturing areas. Surface-to-surface and surface-to-ground resistivity is 3.3 X 10⁷ ohm. 25473 and 25474 will ship separately, direct from the manufacturer.

Marbleized Anti-Fatigue Matting

- **Wearwell UltraSoft Tile-Top Mat**'s double-thick, Nitricell® sponge base offers outstanding comfort, even in the most demanding workplaces. The marbleized rubber surface naturally accents commercial and manufacturing settings and is extremely reliable in heavily-used dry work areas. Mat has an overall thickness of 7/8”.

- **NoTrax Marble Sof-Tyle Mats** are soft enough to provide cushioned comfort and sturdy enough to give you years of service. Mats provide excellent comfort with a tough 3/8” marbleized anti-microbial rubber tile surface bonded to a buoyant 3/8” resilient compound sponge base. RedStop™ is a built-in anti-slip technology that grips all types of smooth floor surfaces. It provides increased friction between the underside of the mat and the floor surface to stop mat movement. Beveled edges reduce tripping.

- **Andersen Hog Heaven Mat** is static-dissipative for use in computer rooms and electrical part manufacturing areas, plus it also works well in welding areas. Nitrile rubber surface offers better chemical resistance and more slip resistance than vinyl-topped mats. The rubber border remains flexible and will not crack or curl. Mat measures ¼” thick and it does not feature a marble pattern.

---

**Our Matting can typically be custom cut to whatever size you need. Call for more details.**

Kneeling Comfort Mats

These 12” X 22” mats reduce knee trauma and lower back stress. They’re ideal for workers who move from place-to-place throughout the day and are constantly kneeling. Mats have a built-in handle, they work on indoor or outdoor surfaces and they’re easy to clean with soap and water because they don’t absorb liquids. Mat with Nitrile Rubber Base provides added durability.

- **Mat with Foam Only** — $21.50
- **Mat with Nitrile Rubber Base** — $30.90

**Welding Mats**

- **NoTrax Ergo Mat** provides employees with superior fatigue relief and improved directional traction in dry and heavy-use work areas. These wear-resistant corrugated rubber-top mats are durable enough for welding applications and offer an overall thickness of ⅜". ⅜" resilient sponge back provides outstanding fatigue relief. Beveled edges reduce slips and trips.

- **Wearwell WeldSafe Mat** is designed specifically for use in welding areas and is specially formulated to repel sparks and hot metal shards. Surface is constructed of a new, thicker ¾" rubber surface over a ⅛ Nitricell® sponge base. The Nitricell sponge base combines PVC and Nitrile rubber to provide exceptional resilience and rebound. Mat now features an elevated melting point of 285°F. Includes a three year warranty.

**Pebble Step Sof-Tred™ Mat with Dyna-Shield™**

This mat is ideal for use in medium-duty dry work areas, but is also chemical-resistant, in case of light spills. Pebble top surface is easy to clean and provides excellent traction. ⅛" thick mat comes with 4" yellow border and beveled edges.
Cushioned Mats

- **NoTrax Comfort-Eze Anti-Fatigue Mat** is constructed of 3/8" solid rubber to provide economical fatigue relief for the worker who stands all day. Surface knobs allow air to flow beneath feet to reduce leg and back stress. Beveled edges minimize tripping.

- **Wearwell Ortho Stand Mat** offers a domed surface that is uniquely designed to massage and comfort feet and promote circulation. 1/2" thick resilient natural rubber mat can be used in wet or dry areas. Yellow beveled border reduces trips.

### Rejuvenator® Mat

The Rejuvenator is constructed with 100% urethane – an incredibly premium sponge compound that makes this mat more resilient than any other anti-fatigue mat. The closed-cell urethane sponge base is totally crush resistant and offers exceptional chemical resistance. The exterior skin provides outstanding abrasion resistance in high use areas. The underside of the mat is textured urethane that grips floors and prevents mat movement. Mat has an overall thickness of 5/8".

Ensure employee comfort with this superior anti-fatigue mat. This 7/16" mat is made of 100% nitrile rubber to provide maximum resistance to water, oils, greases, chemical and animal fats. Mat can also be used in packaging and assembly areas, industrial workstations, machine shops and welding stations. Mat can be easily cleaned with a hose or pressure washer.

Anti-Slip Mats with Drainage Holes

- **Wearwell Worksafe Mat** features drainage holes for safety and traction in wet and greasy areas. Mat measures $\frac{3}{8}$" thick and is constructed of a natural grease-resistant rubber compound.

- **Wearwell Workrite Mat** stands up to water and light grease, making it ideal for use in industrial areas and kitchens. It’s lightweight, easy to clean and provides superior traction. Mat is constructed of a natural rubber compound and measures $\frac{1}{2}$" thick. **10499 will ship separately, direct from the manufacturer.**

- **NoTrax Sanitop Mat** is constructed of a resilient rubber compound that will withstand harsh chemicals, while creating a slip-resistant surface. $\frac{1}{2}$" thick mats have a large hole design that allows liquid and debris to fall through. Molded beveled edges improve safety and provide easy cart access. Black mats are grease-resistant and have a one-year warranty. Red mats are grease-proof and have a three-year warranty. **12389 and 12392 will ship separately, direct from the manufacturer.**

- **Andersen Comfort Flow Mat** brings anti-fatigue properties and anti-slip protection to food processing areas, machine shops, heavy industrial applications and industrial showers and washrooms. Mat measures $\frac{3}{8}$" thick and is lightweight and easy-to-clean, yet it outperforms thicker, heavier mats. 100% closed-cell nitrile rubber construction resists water, oils, greases, chemicals and animal fats. Mat is anti-microbial treated to guard against degradation from micro-organisms and minimize odors.
**Niru Cushion-Ease™ Mats**

- **Niru Cushion-Ease Mats** are made of 100% nitrile rubber to perform in harsh environments where caustic chemicals, cutting fluids and greases are often found. Mats also work well in food production environments. Mats measure 3⁄4” thick and easily snap together to allow for custom configurations.

- **Niru Cushion-Ease GSII Mats** feature exclusive GSII Technology to produce the ultimate in durability and performance in environments where motor oils, industrial oils, hydraulic fluids, cutting fluids, transmission fluids and other caustic chemicals and greases are used. Mats measure 3⁄4” thick and easily snap together to allow for custom configurations.

- **Drainage style mats** feature large holes to facilitate the removal of liquids and debris.

- **Solid silicon carbide grit surface** provides long-lasting traction.

- **Ramps** are made of 100% nitrile rubber and can be easily snapped together to build custom configurations on-site. All ramps are beveled and molded with mitered corners and have a male/female locking system. The tabs lock together the adjoining ramps for a secure, professional corner.

**Fact**

**What is the Real Cost of a Slip, Trip or Fall?**

- Nearly 18% of occupational injuries that cause workers to be absent for more than three days are related to slips, trips or falls that occurred on the same level.

- The average cost of a single slip-and-fall claim is $12,846. A typical slip-and-fall protection program that includes training, proper footwear and safety matting costs less than this.

- Slips and falls account for 35-45% of the insurance claims in the food service industry and up to 50% of the actual monetary payout. Hidden costs such as ongoing medical treatment, hiring replacement employees and defending lawsuits can cause the initial costs to be much higher.
Worksafe Mat

Convert your mats into long runners with a combination of 3’ X 5’ interlocking End and Center mats. Single mats are also available. Mats feature drainage holes for safety and traction in wet and greasy areas. Mats measure 7⁄8” thick and are constructed of a natural grease resistant rubber compound.

Did You Know...

Slips and falls account for 35-45% of the insurance claims in the food service industry.

Cushion-Lok™ Mat

This ⅜” thick heavy-duty PVC mat provides a comfortable slip-resistant surface for use around wet and oily equipment. Grip Step™ surface produces additional traction in extremely slippery conditions.
- Porous diamond-top surface drains water to keep mat dry
- Oil and grease resistant
- Yellow tapered ramps on three sides help prevent trips

Entrance Mats

- **Heritage Rib Entrance Mat** features a ribbed surface to brush and conceal dirt and debris. The 100% polypropylene ribs channel moisture away from foot traffic. Mat has an overall thickness of 3/8”, so it works well in narrow clearance doorways. Vinyl backing helps reduce mat movement. 81486 will ship separately, direct from the manufacturer.

- **Portrait Entrance Mat** is constructed of premium tufted polypropylene to produce increased moisture retention and easier cleaning. Raised parquet pattern facilitates the scraping process, while the channel design retains moisture and debris. Molded rubber cleats on the underside of the mat grip underlying surfaces and minimize mat movement. Mat has an overall thickness of 1/4”.

---

### Heritage Rib Entrance Mat
- **Charcoal**: $37.10
- **Green**: $46.25
- **Blue**: $92.75

### Portrait Entrance Mat
- **Charcoal**: $37.10
- **Blue**: $92.75

---

### Waterhog™ Entrance Mats
- **Classic and Fashion Entrance Mats** can hold up to 1 1/2 gallons of water per square yard, so water and dirt get trapped on your mat, not your floors. 100% premium polypropylene fiber system allows these mats to dry quickly, without fading and rotting. Tri-Grip® cleated rubber backing minimizes the movement of the mat and improves traction. 1/4” thick mat can easily be vacuumed or hosed off. Rubber-reinforced face nubs prevent the pile from crushing, extending the life of the product. Classic Mats feature a rubber border and Fashion Mats feature a fabric border.

- **Premier Entrance Mat** features a unique ridged construction and special “water dam” that traps dirt and water, so they stay on the mat and off of your floors. 3/8” thick mat is constructed with a polypropylene fiber system that allows the fabric to dry quickly, preventing fading and rotting. Rubber gripper backing keeps the mat in place. Rubber-reinforced face nubs prevent the pile from crushing and extend the life of the mat. Mat can easily be vacuumed or hosed off.

Rubber Brush Entrance Mat

Thousands of tough, flexible, rubber fingers squeegee dirt and moisture from shoes. Mat conceals dirt and moisture that builds up in high-traffic entrance areas. Suction cups on back prevent shifting. ⅝" black mat can be cleaned simply by shaking.

UpFront Scraper and OutFront Reversible Scraper Mats

Scrape debris, snow and rain off shoes and keep it out of your facility. Mats are formulated of SBR rubber to be pliable and highly resistant to harsh environmental effects. OutFront Mat is totally reversible. One side features rows of flexible scrapers alternating with quick-dry drainage ports for a brush-and-release effect. The other side features clusters of stiff ridges designed to scrape heavier debris and packed snow off of soles. UpFront Mat is ¼" thick and OutFront Mat is ⅜" thick.

Sabre™ Decalon™ Entrance Mat

¼" thick mats are ideal for interior light traffic areas. 5500 Denier Decalon yarn features twice the yarn thickness of competitive products for greater water retention capacity and longer wear.

Clean Room Mat
Use Where Dirt Contamination is a Hazard
This adhesive surface attracts and contains dust and dirt before entering particulate-controlled environments, with no adhesive transfer. Simply peel off the used sheet to expose a fresh, new surface. Mat can be used on low profile carpet, tile or concrete.
30 sheets per mat, 4 mats per case.

Nitricell™ sponge base offers immediate recovery and more comfort.

Grade A Food Production Mat
This is the first mat designed specifically for the food production and manufacturing industries. This ⅛ thick mat is specially-formulated with an anti-bacterial nitrile rubber composite that withstands vegetable oils, animal fats, citrus and fish oil. The hygienic porthole and solid underside design of the mat simplifies cleaning and virtually eliminates areas where food and bacteria can collect. Underside knobs allow for quick drainage and increase the comfort level of the mat.

Corrugated Switchboard Mats
Protect personnel in areas with dangerous high-voltage equipment. This high-performance, non-conductive matting measures ¼ thick. The corrugated surface is abrasion resistant and easily cleaned. Mats can insulate against as much as 30,000 volts of electricity. However, the recommended usage is up to 17,000 volts. Meets ASTM/ANSI D-178-01 Type 2, Class 2. This product will ship separately, direct from the manufacturer.

Electrically Conductive Anti-Fatigue Mat
Protect Your Electronic Equipment
Use these mats in dry areas to drain static electricity before it can be passed to computers or other devices in the form of a spark. Requires 15’ grounding cord, sold separately below. Diamond-plate surface is bonded to a resilient Nitricell™ sponge base to provide excellent cushioning and fatigue relief. Surface-to-surface and surface-to-ground resistivity is 1 X 10^6 ohm. Three year warranty.
