

Model 4360, 4370 & 4380 Series Diaphragm Packless Valves

Model 4360 Series
Quarter Turn Valve

Model 4370 Series
Full Turn Valve

Model 4380 Series
Air Actuated Valve

The Model 4360, 4370 and 4380 Series Diaphragm Valves feature positive shut-off with minimum force and a diaphragm seal for high purity and low diffusion. These valves are available in three (3) versions:

- [Model 4360 Series Quarter Turn](#)
- [Model 4370 Series Full Turn](#)
- [Model 4380 Series Air Actuated](#)

Specifications

Specifications for all 4360, 4370 and 4380 Series Diaphragm Valves:

Seat Material:	Kel-F
Pressure Range:	Vacuum to 3000 psig
Temperature Range:	-65°F to 150°F (-54°C to 65°C)
C _v Factor:	0.13
Orifice:	0.125

Model 4360 Series Quarter Turn Valves

Description

The Quarter Turn Packless Valve offers the fast-acting convenience of a 90° lever operation with the inherent purity and safety of diaphragm valve construction. The quick open/close action and easy on/off status indication handle are combined with a working pressure rating to a full 3000 psig.

The Model 4364B valve features 316 stainless steel and Kel-F construction for purity, and a variety of 1/4" NPT end connections. This valve is capable of passing a helium leak test to 2 x 10⁻⁸ scc/sec. Valves are supplied with a clear anodized handle.

Model 4370 Series Full Turn Valves

Description

The 4370 Series Full Turn Valves are recommended for high purity applications. These diaphragm valves have multiple metal diaphragms which provide a seal capable of passing a helium leak test to 2 x 10⁻⁸ scc/sec.

Model 4380 Series Air Actuated Valves

Description

The 4380 Series Air Actuated Valves offer pneumatic operation for high purity applications. These diaphragm valves require only 70 psig for pneumatic actuation.
