Model 3030S and 3040S Series
Single-Stage High-Purity/High Delivery Pressure Stainless Steel Regulators

Description
High-purity Stainless Steel regulators designed for delivery pressures up to 2500 psig. Seal material choices are Viton/Teflon or EPR/Vespel. Hydrogen sulfide mixes need to have the EPR/Vespel seals while hydrogen chloride mixtures need to have the Viton/Teflon seals. Viton/Teflon is good for most other gases.

Applications
• Applications requiring delivery pressures up to 2500 psig.
• Delivery of gas to manufacturing processes, charging of systems, purging.

Design Features/Components
• High-purity stainless steel body
• 316 stainless steel piston
• 2” inlet and delivery pressure gauges
• Equipped with outlet needle valve
• 1/4” NPTM outlet connection
• Porous metal filter protects seat from contamination
• Panel mountable

Materials of Construction
Gauges: Stainless Steel
Body: Stainless Steel
Bonnet: Nickel plated brass
Piston: 316 stainless steel

Specifications
Maximum Inlet Pressure: 3500 psig (24,100 kPa)
Maximum Flow Rate: Model 3030S: 4600 SCFH (2170 SLPM)
(At 2500 psig, N₂) Model 3040S: 4600 SCFH (2170 SLPM)
Flow Capacity (Cv): 0.06
Operating Temperature: -15°F to 165°F (-26°C to 74°C)
Porting (Regulator Body): 1/4” NPT Female
Porting Configuration: 2 High, 2 Low
Shipping Weight: 5 lbs
